

1	<b>User Registration</b>	<p>As a new user, I want to register an account to access the app's features.</p>	<ul style="list-style-type: none"> <li>- <b>Given</b> that the user is on the registration screen,</li> <li>- <b>When</b> the user fills out the registration form with valid information,</li> <li>- <b>Then</b> the app should allow the user to submit the form.</li>   <li>- <b>Given</b> that the user has submitted the registration form,</li> <li>- <b>When</b> the entered information passes validation checks,</li> <li>- <b>Then</b> the app should create a new user account.</li>   <li>- <b>Given</b> that the user submits the form,</li> <li>- <b>When</b> the password entered is less than 8 characters long,</li> <li>- <b>Then</b> the app should display an error message prompting the user to enter a password with at least 8 characters.</li>   <li>- <b>Given</b> that the user submits the form,</li> <li>- <b>When</b> the entered email address already exists in the system,</li> <li>- <b>Then</b> the app should display an error message indicating that the email address must be unique.</li>   <li>- <b>Given</b> that the user fills out the registration form,</li> <li>- <b>When</b> the user submits the form without entering a birth date,</li> <li>- <b>Then</b> the app should accept the registration without requiring the birth date field to be filled.</li>   <li>- <b>Given</b> that the user account is successfully created,</li> <li>- <b>Then</b> the app should automatically log in the user and redirect them to their dashboard.</li> </ul>
2	<b>User Login</b>	<p>As a registered user, I want to log in to my</p>	<ul style="list-style-type: none"> <li>- <b>Given</b> that the user is on the login page,</li> <li>- <b>When</b> the login form is displayed,</li> </ul>

	<p>account to access my personalized content.</p>	<ul style="list-style-type: none"> <li>- <b>Then</b> the form should include fields for entering the email and password.</li> </ul> <p>Given that the user enters their email and password,</p> <ul style="list-style-type: none"> <li>- <b>When</b> the user submits the login form,</li> <li>- <b>Then</b> the app should validate the email and password fields.</li> </ul> <ul style="list-style-type: none"> <li>- <b>Given</b> that the user submits the login form with invalid credentials,</li> <li>- <b>When</b> the entered email or password is incorrect,</li> <li>- <b>Then</b> the app should display an error message indicating invalid credentials.</li> </ul> <ul style="list-style-type: none"> <li>- <b>Given</b> that the user submits the login form with valid credentials,</li> <li>- <b>When</b> the entered email and password match a registered user's credentials,</li> <li>- <b>Then</b> the app should authenticate the user and allow access to their account.</li> </ul> <ul style="list-style-type: none"> <li>- <b>Given</b> that the user successfully logs in,</li> <li>- <b>Then</b> the app should redirect the user to their dashboard where they can access personalized content.</li> </ul>
3	<p><b>User Login with Google Account</b></p>	<p>As a user, I want to be able to log in to the app using my Google account for seamless authentication.</p> <ul style="list-style-type: none"> <li>- <b>Given</b> that the user is on the login screen,</li> <li>- <b>When</b> the login screen is displayed,</li> <li>- <b>Then</b> there should be a prominent option to log in with Google.</li> </ul> <ul style="list-style-type: none"> <li>- <b>Given</b> that the user clicks on the "Login with Google" button,</li> <li>- <b>When</b> the button is clicked,</li> <li>- <b>Then</b> the app should initiate the Google OAuth authentication flow.</li> </ul> <ul style="list-style-type: none"> <li>- <b>Given</b> that the user successfully authenticates with Google,</li> <li>- <b>When</b> the user's Google account information is received,</li> </ul>

			<ul style="list-style-type: none"> <li>- <b>Then</b> the app should use this information to create a new account or log in to an existing account in the app.</li>   <li>- <b>Given</b> that the user successfully logs in with their Google account,</li> <li>- <b>When</b> the login process is completed,</li> <li>- <b>Then</b> the app should redirect the user to their dashboard.</li> </ul>
4	<b>User Login with Apple Account</b>	As a user, I want to be able to log in to the app using my Apple account for secure authentication.	<ul style="list-style-type: none"> <li>- <b>Given</b> that the user is on the login screen,</li> <li>- <b>When</b> the login screen is displayed,</li> <li>- <b>Then</b> there should be a prominent option to log in with Apple.</li>   <li>- <b>Given</b> that the user clicks on the "Login with Apple" button,</li> <li>- <b>When</b> the button is clicked,</li> <li>- <b>Then</b> the app should initiate the Apple Sign In authentication flow.</li>   <li>- <b>Given</b> that the user successfully authenticates with Apple,</li> <li>- <b>When</b> the user's Apple account information is received,</li> <li>- <b>Then</b> the app should use this information to create a new account or log in to an existing account in the app.</li>   <li>- <b>Given</b> that the user successfully logs in with their Apple account,</li> <li>- <b>When</b> the login process is completed,</li> <li>- <b>Then</b> the app should redirect the user to their dashboard.</li> </ul>
5	<b>Create a New One Time Task</b>	As a user, I want to create a one-time task to manage activities that occur only once.	<ul style="list-style-type: none"> <li>- <b>Given</b> that the user is on the dashboard,</li> <li>- <b>When</b> the user wants to create a new task,</li> <li>- <b>Then</b> there should be a visible option to create a new task.</li>   <li>- <b>Given</b> that the user clicks on the option to create a new task,</li> <li>- <b>When</b> the user selects the task type as a one-time task and proceeds to the next step,</li> </ul>

		<ul style="list-style-type: none"> <li>- <b>Then</b> the app should redirect the user to the screen for adding task details.</li>   <li>- <b>Given</b> that the user is on the screen for adding task details,</li> <li>- <b>When</b> the user enters a required title and date for the one-time task,</li> <li>- <b>Then</b> the app should allow the user to proceed with creating the task.</li>   <li>- <b>Given</b> that the user is on the screen for adding task details,</li> <li>- <b>When</b> the user wants to add additional details such as a description for the one-time task,</li> <li>- <b>Then</b> the app should provide an option to enter a description, which is not required.</li>   <li>- <b>Given</b> that the user has entered all necessary details for the one-time task and submitted the form,</li> <li>- <b>When</b> the user submits the task,</li> <li>- <b>Then</b> the app should save the task and display it in the user's task list on the dashboard with the provided details.</li> </ul>
6	<b>Create a New Weekly Task</b>	<p>As a user, I want to be able to create a task that repeats weekly so that I can manage recurring activities.</p> <ul style="list-style-type: none"> <li>- <b>Given</b> that the user is on the dashboard,</li> <li>- <b>When</b> the user wants to create a new task,</li> <li>- <b>Then</b> there should be a visible option to create a new task.</li>   <li>- <b>Given</b> that the user clicks on the option to create a new task,</li> <li>- <b>When</b> the user selects the task type as a repeatable task and proceeds to the next step,</li> <li>- <b>Then</b> the app should redirect the user to the screen for choosing the repeatable type.</li>   <li>- <b>Given</b> that the user is on the screen for choosing the repeatable type,</li> <li>- <b>When</b> the user selects the option for a weekly task and proceeds to the next step,</li> <li>- <b>Then</b> the app should redirect the user to the screen for adding task details.</li> </ul>

			<ul style="list-style-type: none"> <li>- <b>Given</b> that the user is on the screen for adding task details,</li> <li>- <b>When</b> the user enters a required title and the number of weeks the task will repeat,</li> <li>- <b>Then</b> the app should allow the user to proceed with creating the task.</li> </ul> <ul style="list-style-type: none"> <li>- <b>Given</b> that the user is on the screen for adding task details,</li> <li>- <b>When</b> the user wants to add additional details such as a description for the weekly task,</li> <li>- <b>Then</b> the app should provide an option to enter a description, which is not required.</li> </ul> <ul style="list-style-type: none"> <li>- <b>Given</b> that the user has entered all necessary details for the weekly task and submitted the form,</li> <li>When the user submits the task,</li> <li>- <b>Then</b> the app should save the task and display it in the user's task list on the dashboard with the provided details.</li> </ul>
7	<b>Create a New Monthly Task</b>	As a user, I want to create a task that repeats monthly so that I can manage monthly recurring activities.	<ul style="list-style-type: none"> <li>- <b>Given</b> that the user is on the dashboard,</li> <li>- <b>When</b> the user wants to create a new task,</li> <li>- <b>Then</b> there should be a visible option to create a new task.</li> </ul> <ul style="list-style-type: none"> <li>- <b>Given</b> that the user clicks on the option to create a new task,</li> <li>- <b>When</b> the user selects the task type as a repeatable task and proceeds to the next step,</li> <li>- <b>Then</b> the app should redirect the user to the screen for choosing the repeatable type.</li> </ul> <ul style="list-style-type: none"> <li>- <b>Given</b> that the user is on the screen for choosing the repeatable type,</li> <li>- <b>When</b> the user selects the option for a monthly task and proceeds to the next step,</li> <li>- <b>Then</b> the app should redirect the user to the screen for adding task details.</li> </ul>

		<ul style="list-style-type: none"> <li>- <b>Given</b> that the user is on the screen for adding task details,</li> <li>- <b>When</b> the user enters a required title and the number of months the task will repeat,</li> <li>- <b>Then</b> the app should allow the user to proceed with creating the task.</li> </ul> <ul style="list-style-type: none"> <li>- <b>Given</b> that the user is on the screen for adding task details,</li> <li>- <b>When</b> the user wants to add additional details such as a description for the monthly task,</li> <li>- <b>Then</b> the app should provide an option to enter a description, which is not required.</li> </ul> <ul style="list-style-type: none"> <li>- <b>Given</b> that the user has entered all necessary details for the monthly task and submitted the form,</li> <li>- <b>When</b> the user submits the task,</li> <li>- <b>Then</b> the app should save the task and display it in the user's task list on the dashboard with the provided details.</li> </ul>
8	<b>Create a New Yearly Task</b>	<p>As a user, I want to create a task that repeats yearly to manage recurring activities.</p> <ul style="list-style-type: none"> <li>- <b>Given</b> that the user is on the dashboard,</li> <li>- <b>When</b> the user wants to create a new task,</li> <li>- <b>Then</b> there should be a visible option to create a new task.</li> </ul> <ul style="list-style-type: none"> <li>- <b>Given</b> that the user clicks on the option to create a new task,</li> <li>- <b>When</b> the user selects the task type as a repeatable task and proceeds to the next step,</li> <li>- <b>Then</b> the app should redirect the user to the screen for choosing the repeatable type.</li> </ul> <ul style="list-style-type: none"> <li>- <b>Given</b> that the user is on the screen for choosing the repeatable type,</li> <li>- <b>When</b> the user selects the option for a yearly task and proceeds to the next step,</li> <li>- <b>Then</b> the app should redirect the user to the screen for adding task details.</li> </ul> <ul style="list-style-type: none"> <li>- <b>Given</b> that the user is on the screen for adding task details,</li> </ul>

		<ul style="list-style-type: none"> <li>- <b>When</b> the user enters a required title and the number of years the task will repeat,</li> <li>- <b>Then</b> the app should allow the user to proceed with creating the task.</li>   <li>- <b>Given</b> that the user is on the screen for adding task details,</li> <li>- <b>When</b> the user wants to add additional details such as a description for the yearly task,</li> <li>- <b>Then</b> the app should provide an option to enter a description, which is not required.</li>   <li>- <b>Given</b> that the user has entered all necessary details for the yearly task and submitted the form,</li> <li>- <b>When</b> the user submits the task,</li> <li>- <b>Then</b> the app should save the task and display it in the user's task list on the dashboard with the provided details.</li> </ul>
9	<b>Change account name</b>	<p>As a registered user, I want to be able to change my account name, So that I can keep my profile information up-to-date.</p> <ul style="list-style-type: none"> <li>- <b>Given</b> a user is logged into their account,</li> <li>- <b>When</b> they navigate to the account settings page,</li> <li>- <b>Then</b> they should be able to locate the option to edit their account name, upon selecting this option, they can input a new name,</li> </ul> <p>Finally, after confirming the change, their account name should be updated throughout the platform.</p>
10	<b>Change Account Password</b>	<p>As a registered user, I want to have the ability to change my account password, So that I can enhance the security of my account and ensure confidentiality.</p> <ul style="list-style-type: none"> <li>- <b>Given</b> I am logged into my account, <b>When</b> I navigate to the account settings page, And select the option to change my password,</li> <li>- <b>Then</b> I should see fields to input my current password, new password, and confirm the new password.</li>   <li>- <b>Given</b> I input my current password incorrectly, <b>When</b> I try to save the changes,</li> <li>- <b>Then</b> I should see an error message indicating that the current password is incorrect, and the changes should not be saved.</li> </ul>

		<ul style="list-style-type: none"> <li>- <b>Given</b> I input my current password correctly, And I input a new password that meets the required criteria (e.g., minimum length, combination of letters, numbers, and special characters), And the new password matches the confirmation password,</li> <li>- <b>When</b> I click the "Save" or "Update" button,</li> <li>- <b>Then</b> my account password should be updated successfully, and I should receive a confirmation message.</li> </ul> <ul style="list-style-type: none"> <li>- <b>Given</b> I try to input a new password that does not meet the required criteria,</li> <li>- <b>When</b> I attempt to save the changes,</li> <li>- <b>Then</b> I should see an error message indicating the password requirements, and the changes should not be saved.</li> </ul> <ul style="list-style-type: none"> <li>- <b>Given</b> I input a new password that meets the criteria,</li> <li>But the confirmation password does not match the new password,</li> <li>- <b>When</b> I try to save the changes,</li> <li>- <b>Then</b> I should see an error message indicating that the confirmation password does not match, and the changes should not be saved.</li> </ul> <ul style="list-style-type: none"> <li>- <b>Given</b> I have successfully changed my account password,</li> <li>- <b>When</b> I attempt to log in again,</li> <li>- <b>Then</b> I should only be able to access my account using the new password.</li> </ul>
1	<b>Change Account Image</b>	<p>As a registered user, I want to be able to change my account image, So that I can personalize my profile and make it visually appealing.</p> <ul style="list-style-type: none"> <li>- <b>Given</b> I am logged into my account,</li> <li>- <b>When</b> I navigate to the account settings page, And select the option to edit my profile,</li> <li>- <b>Then</b> I should see an option to upload a new account image.</li> </ul> <ul style="list-style-type: none"> <li>- <b>Given</b> I click on the option to upload a new account image,</li> <li>- <b>When</b> I select an image file from my device,</li> </ul>

		<p>And the selected file meets the specified file type and size requirements,</p> <ul style="list-style-type: none"> <li>- <b>Then</b> the new image should be displayed as my account image immediately upon successful upload.</li> </ul> <p>- <b>Given</b> I attempt to upload an image file that exceeds the specified size limit,</p> <ul style="list-style-type: none"> <li>- <b>When</b> I try to save the changes,</li> <li>- <b>Then</b> I should see an error message indicating that the file size exceeds the limit, and the changes should not be saved.</li> </ul> <p>- <b>Given</b> I attempt to upload a file that is not in the specified image format (e.g., JPG, PNG),</p> <ul style="list-style-type: none"> <li>- <b>When</b> I try to save the changes,</li> <li>- <b>Then</b> I should see an error message indicating that the file format is not supported, and the changes should not be saved.</li> </ul> <p>- <b>Given</b> I have successfully uploaded a new account image,</p> <ul style="list-style-type: none"> <li>- <b>When</b> I view my profile or perform any action within the platform that displays my account image,</li> <li>- <b>Then</b> I should see the new image reflected consistently across all relevant sections of the platform.</li> </ul>
1 2	<b>Log Out</b>	<p>As a registered user, I want to have the ability to log out of my account, So that I can secure my account and protect my privacy, especially when using shared or public devices.</p> <ul style="list-style-type: none"> <li>- <b>Given</b> I am logged into my account,</li> <li>- <b>When</b> I navigate to the account settings page or any other page within the platform,</li> <li>- <b>Then</b> I should see a "Log Out" option prominently displayed.</li> </ul> <p>- <b>Given</b> I click on the "Log Out" option,</p> <ul style="list-style-type: none"> <li>- <b>When</b> I confirm my action (if confirmation is required),</li> <li>- <b>Then</b> I should be logged out of my account immediately and redirected to the login page or the home page.</li> </ul>

		<ul style="list-style-type: none"> <li>- <b>Given</b> I am logged out of my account,</li> <li>- <b>When</b> I try to access any page or perform any action within the platform that requires authentication,</li> <li>- <b>Then</b> I should be redirected to the login page and prompted to log in again.</li> </ul> <ul style="list-style-type: none"> <li>- <b>Given</b> I am logged out of my account, And I try to use the browser's back button to return to a previously visited page,</li> <li>- <b>Then</b> I should not be able to access any secured pages or sensitive information without logging back in.</li> </ul>
1 3	<b>Change App Language from English to Arabic</b>	<p>As a user of the application, I want to have the option to change the app language from English to Arabic, So that I can use the application in a language that I am more comfortable with.</p> <ul style="list-style-type: none"> <li>- <b>Given</b> I am using the application in English,</li> <li>- <b>When</b> I navigate to the settings or preferences section, And I look for the language settings,</li> <li>- <b>Then</b> I should see an option to change the language.</li> </ul> <ul style="list-style-type: none"> <li>- <b>Given</b> I select the option to change the language,</li> <li>- <b>When</b> I see the list of available languages,</li> <li>- <b>Then</b> Arabic should be one of the options listed.</li> </ul> <ul style="list-style-type: none"> <li>- <b>Given</b> I select Arabic as the preferred language,</li> <li>- <b>When</b> I confirm my selection,</li> <li>- <b>Then</b> the language of the entire application interface should switch to Arabic immediately.</li> </ul> <ul style="list-style-type: none"> <li>- <b>Given</b> the language is changed to Arabic,</li> <li>- <b>When</b> I navigate through the application's menus and screens,</li> <li>- <b>Then</b> all text, labels, and prompts should be displayed in Arabic.</li> </ul> <ul style="list-style-type: none"> <li>- <b>Given</b> I want to switch back to English,</li> <li>- <b>When</b> I navigate to the language settings again,</li> </ul>

			- <b>Then</b> I should be able to select English as the language option, and the interface should switch back to English accordingly.
1 4	<b>Change the App Language from Arabic to English</b>	As a user of the application, I want to have the option to change the app language from Arabic to English, So that I can use the application in a language that I am more comfortable with.	<ul style="list-style-type: none"> <li>- <b>Given</b> I am using the application in Arabic,</li> <li>- <b>When</b> I navigate to the settings or preferences section, And I look for the language settings,</li> <li>- <b>Then</b> I should see an option to change the language.</li>   <li>- <b>Given</b> I select the option to change the language,</li> <li>- <b>When</b> I see the list of available languages,</li> <li>- <b>Then</b> English should be one of the options listed.</li>   <li>- <b>Given</b> I select English as the preferred language,</li> <li>- <b>When</b> I confirm my selection,</li> <li>- <b>Then</b> the language of the entire application interface should switch to English immediately.</li>   <li>- <b>Given</b> the language is changed to English,</li> <li>- <b>When</b> I navigate through the application's menus and screens,</li> <li>- <b>Then</b> all text, labels, and prompts should be displayed in English.</li>   <li>- <b>Given</b> I want to switch back to Arabic,</li> <li>- <b>When</b> I navigate to the language settings again,</li> <li>- <b>Then</b> I should be able to select Arabic as the language option, and the interface should switch back to Arabic accordingly.</li> </ul>
1 5	<b>Add Public Task</b>	As a user of the task management system, I want to have the ability to add a task with public visibility, So that I can share the task details with others	<ul style="list-style-type: none"> <li>- <b>Given</b> I am logged into the task management system,</li> <li>- <b>When</b> I navigate to the task creation page,</li> <li>- <b>Then</b> I should see an option to set the task visibility.</li>   <li>- <b>Given</b> I select the option to set task visibility,</li> <li>- <b>When</b> I choose "Public" as the visibility option,</li> </ul>

		<p>and collaborate effectively.</p>	<ul style="list-style-type: none"> <li>- <b>Then</b> the task should be accessible to all users of the system.</li>   <li>- <b>Given</b> I am creating a public task,</li> <li>- <b>When</b> I fill in the task details (such as title, description, due date, etc.),</li> <li>And I save the task,</li> <li>- <b>Then</b> the task should be added to the system with public visibility.</li>   <li>- <b>Given</b> I have added a public task,</li> <li>- <b>When</b> other users access the task management system,</li> <li>- <b>Then</b> they should be able to view the public task along with its details.</li>   <li>- <b>Given</b> I want to change the visibility of an existing task to public,</li> <li>- <b>When</b> I edit the task settings,</li> <li>- <b>Then</b> I should be able to change the visibility to "Public" and save the changes successfully.</li> </ul>
1 6	<b>Share Public Task</b>	<p>As a user of the task management system, I want to be able to share a public task with specific users or groups, So that I can collaborate with selected individuals on a shared task.</p>	<ul style="list-style-type: none"> <li>- <b>Given</b> I am viewing a public task in the task management system,</li> <li>- <b>When</b> I navigate to the task details page,</li> <li>- <b>Then</b> I should see an option to share the task.</li>   <li>- <b>Given</b> I select the option to share the task,</li> <li>- <b>When</b> I choose the users or groups with whom I want to share the task,</li> <li>- <b>Then</b> those selected users or groups should be granted access to view and possibly edit the task.</li>   <li>- <b>Given</b> I share a public task with specific users or groups,</li> <li>- <b>When</b> those users or group members access the task management system,</li> <li>- <b>Then</b> they should see the shared task listed in their task dashboard or notifications.</li>   <li>- <b>Given</b> I want to revoke access to a shared task,</li> </ul>

			<ul style="list-style-type: none"> <li>- <b>When</b> I navigate to the task settings or sharing options,</li> <li>- <b>Then</b> I should be able to remove specific users or groups from the shared access list, effectively revoking their access to the task.</li> </ul>
1 7	<b>Like Public Task</b>	<p>As a user of the task management system, I want to be able to express my appreciation or agreement with a public task by liking it, So that I can provide feedback and acknowledgment to the task creator.</p>	<ul style="list-style-type: none"> <li>- <b>Given</b> I am viewing a public task in the task management system,</li> <li>- <b>When</b> I navigate to the task details page,</li> <li>- <b>Then</b> I should see an option to like the task.</li>   <li>- <b>Given</b> I select the option to like the task,</li> <li>- <b>When</b> I click on the like button,</li> <li>- <b>Then</b> the task's like count should increment by one, indicating that I have liked the task.</li>   <li>- <b>Given</b> I have liked a public task,</li> <li>- <b>When</b> I view the task details page again,</li> <li>- <b>Then</b> I should see my like registered and displayed alongside the task.</li>   <li>- <b>Given</b> I want to unlike a task,</li> <li>- <b>When</b> I click on the like button again,</li> <li>- <b>Then</b> the task's like count should decrement by one, and my like should be removed from the task.</li> </ul>
1 8	<b>Comment on Public Task</b>	<p>As a user of the task management system, I want to be able to comment on a public task, So that I can provide feedback, ask questions, or engage in discussions related to the task.</p>	<ul style="list-style-type: none"> <li>- <b>Given</b> I am viewing a public task in the task management system,</li> <li>- <b>When</b> I navigate to the task details page,</li> <li>- <b>Then</b> I should see an option to add a comment.</li>   <li>- <b>Given</b> I select the option to add a comment,</li> <li>- <b>When</b> I type my comment in the provided text box, And I click the "Post" or "Send" button,</li> <li>- <b>Then</b> my comment should be successfully posted and displayed below the task.</li>   <li>- <b>Given</b> I have posted a comment on a public task,</li> <li>- <b>When</b> other users view the task details page,</li> </ul>

		<ul style="list-style-type: none"> <li>- <b>Then</b> they should be able to see my comment along with my username and the timestamp of the comment.</li>   <li>- <b>Given</b> I want to edit or delete my comment,</li> <li>- <b>When</b> I hover over my comment or click on a menu option,</li> <li>- <b>Then</b> I should see options to edit or delete my comment.</li>   <li>- <b>Given</b> I edit my comment,</li> <li>- <b>When</b> I make changes and save,</li> <li>- <b>Then</b> my comment should be updated with the edited content.</li>   <li>- <b>Given</b> I delete my comment,</li> <li>- <b>When</b> I confirm the deletion,</li> <li>- <b>Then</b> my comment should be removed from the task, and other users should no longer see it.</li> </ul>
1 9	<b>Follow Other Users</b>	<p>As a user of the platform, I want to be able to follow other users, So that I can stay updated on their activities and engage with their content.</p> <ul style="list-style-type: none"> <li>- <b>Given</b> I am logged into the platform,</li> <li>- <b>When</b> I navigate to a user's profile page,</li> <li>- <b>Then</b> I should see an option to follow that user.</li>   <li>- <b>Given</b> I select the option to follow a user,</li> <li>- <b>When</b> I click the "Follow" button,</li> <li>- <b>Then</b> I should start following that user, and the button should change to "Following".</li>   <li>- <b>Given</b> I am following a user,</li> <li>- <b>When</b> that user performs actions such as posting content or updating their profile,</li> <li>- <b>Then</b> I should receive notifications or see their activities in my feed.</li>   <li>- <b>Given</b> I want to unfollow a user,</li> <li>- <b>When</b> I navigate to the user's profile page or my list of followed users,</li> <li>- <b>Then</b> I should see an option to unfollow that user.</li>   <li>- <b>Given</b> I select the option to unfollow a user,</li> <li>- <b>When</b> I confirm the action,</li> </ul>

			- <b>Then</b> I should stop following that user, and their activities should no longer appear in my feed.
